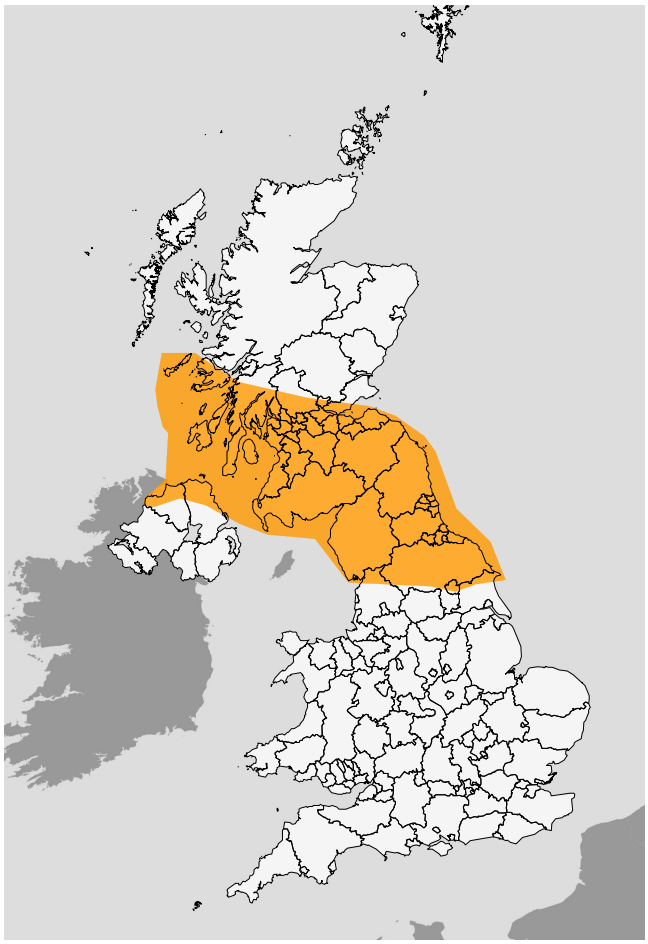
Amber warning
Wind

Between
14:00 Wed 16 Feb 2022 and
23:59 Wed 16 Feb 2022



Storm Dudley is expected to affect the UK later on Wednesday, bringing a period of strong and potentially disruptive winds.

What to expect

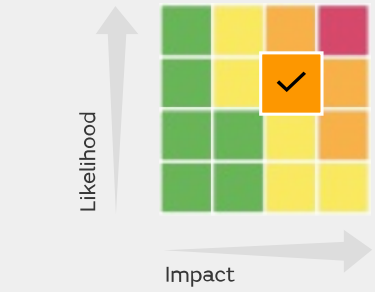
- Road, rail, air and ferry services likely to be affected, and some roads and bridges are likely to close, leading to longer journey times and cancellations.
- Perhaps some fallen trees and damage to buildings, such as tiles blown from roofs
- There is a chance that power cuts may occur, with the potential to affect other services, such as mobile phone coverage
- Large waves and beach material may be thrown onto coastal roads, sea fronts and properties

Further details

Very strong westerly winds are expected to develop across southwest Scotland and northern parts of Northern Ireland on Wednesday afternoon, extending eastward across southern Scotland and northern England during the evening. There is still some uncertainty in the timing and location of the strongest winds but inland gusts of 60-70 mph are likely, perhaps briefly 75-80 mph in a few places, mostly exposed sites.

Reason for update

Start time brought forward, peak winds reduced as well as associated impacts.



Medium likelihood of medium impacts
